

# Lucas Silbernagel

[hello@lucassilbernagel.com](mailto:hello@lucassilbernagel.com) • Toronto, Canada • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

Hi, I'm Lucas! I'm a Toronto-based software developer, and I've been specializing in front-end development since 2020. My main passion is crafting accessible, high-performance user experiences. I thrive in a little bit of chaos, where my collaborative and organizational skills really shine. Stakeholders and teammates appreciate my ability to iterate rapidly while maintaining and improving code quality. Beyond my technical work, I really enjoy empowering other developers with detailed documentation, educational presentations, and one-on-one mentoring conversations.

## EXPERIENCE

---

### [theScore](#)

**March 2025 – present**

Senior Software Engineer

Toronto, Canada

- Drove accelerated market entry for theScore Casino web application, launching the product two months ahead of schedule, which involved end-to-end setup of the new app theme, Google Tag Manager, visual regression testing, and build pipeline updates.
- Spearheaded development for high-value casino features including the complex In-House Jackpots system, introducing the Rive animation framework to the repository, and developing the animated cash rolodex component for the lobby.
- Led or collaborated on multiple major features concurrently consistently delivering on aggressive deadlines and navigating unexpected technical obstacles to achieve successful project completion.
- Enhanced web platform scalability and developer velocity by writing and presenting several RFCs to establish architectural improvements, including proposals to take advantage of more of the performance-enhancing features provided by Next.js.
- Improved application stability and user experience by architecting a new theme testing strategy across standalone casino products and implementing a centralized persistence management solution for one-time user messages (e.g., tooltips and modals).

### [theScore](#)

**March 2024 – March 2025**

Software Developer

Toronto, Canada

- Led the web development effort for the Hollywood Casino application launch on Next.js, resulting in a deployment six weeks ahead of schedule and enabling immediate revenue generation.
- Engineered critical casino promo credits features, including the order of funds selection modal, Available Rewards section, and account settings integration, achieving feature parity with competitors.
- Improved technical visibility and operations by creating a Casino Client Page Load Performance dashboard in Datadog and consolidating performance metrics, and personally handled 8 non-production and 2 production deployments.
- Spearheaded documentation and cross-functional coordination by writing a technical RFC and ticket planning document to align web, infrastructure, DevOps, and platform teams for the standalone casino project.
- Championed web accessibility and development standards by working on features like animated game card focus states and refactoring CI pipeline configuration to enable visual regression and accessibility testing for new applications like Hollywood Casino.

### [Xanadu](#)

**January 2023 – March 2024**

Software Developer II

Toronto, Canada

- Enhanced the Xanadu.ai website by implementing server-side rendering, image optimization, and several new pages. Leveraged Shopify APIs to seamlessly integrate the Xanadu merchandise shop into the website.
- Drove the front-end work for a refresh of the quantum hackathon software challenge dashboard.
- Migrated the PennyLane.ai website from a Python templating system to a modern development framework using Gatsby, React, TypeScript, and Tailwind.
- Led front-end development of the Generic Datasets project for visualizing and interacting with quantum datasets (scoping, requirements gathering, and implementation).

## Xanadu

Front-End Developer

**April 2022 – December 2022**

Toronto, Canada

- Led a company-wide accessibility audit and advocated for compliance with web accessibility best practices.
- Co-created a reusable component library built with React, TypeScript, Tailwind, and Storybook.
- Developed key features of Xanadu's quantum hackathon software with React, TypeScript, Tailwind, and GraphQL.

## CarbonCure Technologies

Front-End Developer

**March 2021 – April 2022**

Toronto, Canada (remote)

- Responsible for planning, building, testing, and improving CarbonCure's internal suite of software applications.
- Lead developer of two key projects built with React, TypeScript, and MUI incorporating map layers, tables, and other data visualizations.
- Published release notes and performed live and pre-recorded product demos for stakeholders.

## Greenpeace Canada

Front-End Developer

**July 2020 - February 2021**

Toronto, Canada

- Maintained and improved the Greenpeace Canada website using WordPress, HTML, CSS, and JavaScript.
- Developed petition pages, donation pages, and emails using Greenpeace Canada's advocacy tools.
- Managed relationships with external designers, developers, and internal end users.

## TECHNICAL SKILLS

---

|                                 |                                                       |
|---------------------------------|-------------------------------------------------------|
| Languages                       | HTML, CSS, JavaScript, TypeScript                     |
| Libraries and frameworks        | React, Next.js, Gatsby, Remix                         |
| State management                | React Context, Zustand, Apollo Client, TanStack Query |
| Styling and component libraries | Tailwind CSS, MUI, shadcn/ui, etc.                    |
| Data                            | REST APIs, GraphQL APIs                               |
| Backend                         | Node.js, Express, Apollo Server, MongoDB, Firebase    |
| Content management              | Sanity, Strapi, Shopify, WordPress                    |
| Software testing                | Jest, React Testing Library, Vitest, Playwright, etc. |

## EDUCATION

---

### Juno College of Technology

Web Development Immersive Bootcamp

**February 2020 - May 2020**

Toronto, Canada

### University of Toronto

Master of Arts, Sociocultural Anthropology

**September 2014 - August 2015**

Toronto, Canada

### University of British Columbia

Bachelor of Arts, Anthropology and French

**September 2009 - August 2013**

Kelowna, Canada
